Course: CSEC 4390 - Practicum in Cyber Security
Practicum Project Presentation Grading Rubric
Team Name/Members: Garrett Stokes, Marcus D. Harmon, and Abdulrahman Alqarni
Date of Presentation: May 10, 2024
Project Title: Google Cloud Platform Cybersecurity

Grading Topic	Points Earned	Points Possible
Delivery The presenters were clear and articulate.	18	20
Organization Information was presented in a logical, interesting sequence which the audience could follow.	20	20
Quality of Presentation (Using Report or Slides) Visual aids were well done and used to make presentation more interesting and meaningful.	15	20
Knowledge The presenters were knowledgeable about the topic as evidenced by the depth and completeness of the presentation.	10	10
Professionalism The presenters were professional during the presentation and in all interactions with the audience	10	10
Technical Content The content of the presentation was accurate and appropriate for the assignment.	10	10
Timing/Duration 15 minutes (including Questions and Answers [Q&A])	7	10
Total	90	100

Disclosure: The total number of earned points is multiplied by percentage of the final score related to this activity (20%)

Additional Comments:

- Project Schedule Management: I recommend using the timeline view
- You have to be cautious about the images you use as they were not readable. Be careful with the ratio of images. Some where distorted.
- Excellent technical knowledge.
- What happened on slide 23 "2.9"? It was not to the standard of the other slides.

Course: CSEC 4390 - Practicum in Cyber Security
Practicum Project Presentation Grading Rubric
Team Name/Members: Garrett Stokes, Hassan Almedani, Abdulrahman Alqarni
Date of Presentation: May 19, 2022
Project Title: Google Cloud Platform Cybersecurity

Grading Topic	Points Earned	Points Possible
Delivery The presenters were clear and articulate.	17	20
Organization Information was presented in a logical, interesting sequence which the audience could follow.	20	20
Quality of Presentation (Using Report or Slides) Visual aids were well done and used to make presentation more interesting and meaningful.	20	20
Knowledge The presenters were knowledgeable about the topic as evidenced by the depth and completeness of the presentation.	10	10
Professionalism The presenters were professional during the presentation and in all interactions with the audience	10	10
Technical Content The content of the presentation was accurate and appropriate for the assignment.	10 + 5	10
Timing/Duration 15 minutes (including Questions and Answers [Q&A])	8	10
Total	100	100

extra credit (written beside Technical Content row)

Disclosure: The total number of earned points is multiplied by percentage of the final score related to this activity (20%)

Additional Comments:

* Very good that you illustrate each step of the process All steps are explained.
* Read most of the slides. No eye contact with audience
* Good comparison on grdes on slide 23 (21?)
* Good work in general

Knowledge The presenters were knowledgeable about the topic as evidenced by the depth and completeness of the presentation.	10	10
Professionalism The presenters were professional during the presentation and in all interactions with the audience	10	10
Technical Content The content of the presentation was accurate and appropriate for the assignment.	10	10
Timing/Duration 15 minutes (including Questions and Answers [Q&A])	8	10
Total	97	100

Disclosure: The total number of earned points is multiplied by percentage of the final score related to this activity (20%)

Additional Comments:

Good use of different software, and GitHub.

Good choice of using free opensource software for this project.

Over the 15 minute duration for presentation.

Additional Comments:

Some team members were reading off the slides. Overall, the presentation had good technical content. presentation took longer than 15 minutes. Most of the presentation was presented by Garrett, which I assume that he have done most of the work. Marcus also explained the security part.

Very lengthy presentation
